

Application Serial No. 10/048,114
Amendment dated July 30, 2007
Reply to Final Office Action dated April 5, 2007

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-9 (canceled)

Claim 10 (previously presented): The process according to claim 15, wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device.

Claims 11-24 (canceled)

Claim 15 (currently amended): A process for transferring data from a data-preparing device to a data-requesting device, comprising:

the data-requesting device requests, over a network, data to be transmitted to it by the data-preparing device;

the data-requesting device transmits to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device;

the data-preparing device then, according to availability at the data-preparing device, selects the best-suited display format from the list of usable display formats transmitted by the data-requesting device; [[and]]

the requested data being stored in a central data bank of the data-preparing device;
a formatting device formats, on call, the requested data into said best suited display format that is available; and

the data-preparing device then transmits the requested data over the network to the data-requesting device in the selected display format.

Claim 16 (new): A process for transferring data from a data-preparing device to a data-requesting device, comprising:

the data-requesting device requests, over a network, data to be transmitted to it by the data-preparing device wherein the requested data includes textual data contained in graphics data;

the data-requesting device transmits to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device;

the data-preparing device then, according to availability at the data-preparing device, selects the best-suited display format from the list of usable display formats transmitted by the data-requesting device;

the requested data being stored in a central data bank of the data-preparing device;

a formatting device formats, on call, the requested data into said best suited display format that is available, said best suited display format being mere textual format; and

the data-preparing device then transmits the requested data over the network to the data-requesting device in the selected display textual format.
